This is the log in page:

Enter the login info as supplied from Trailer Alarms

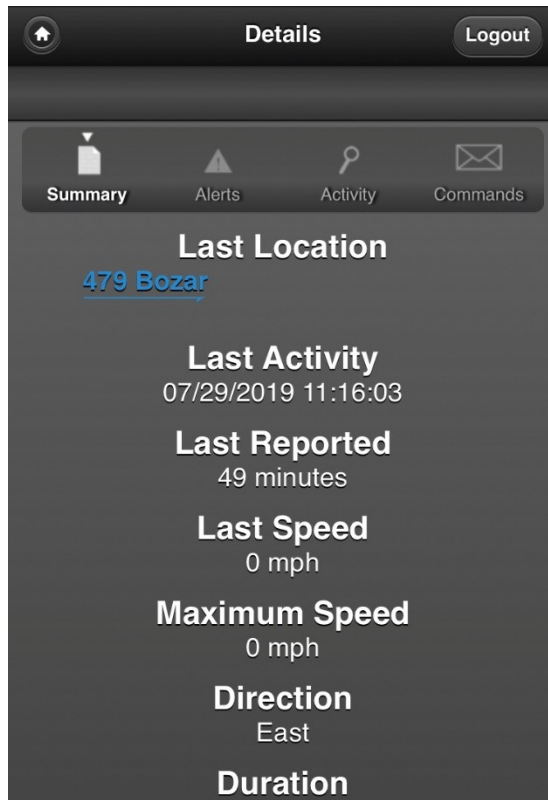

Once logged in, you will access the Dashboard screen and you will see the status of your system:

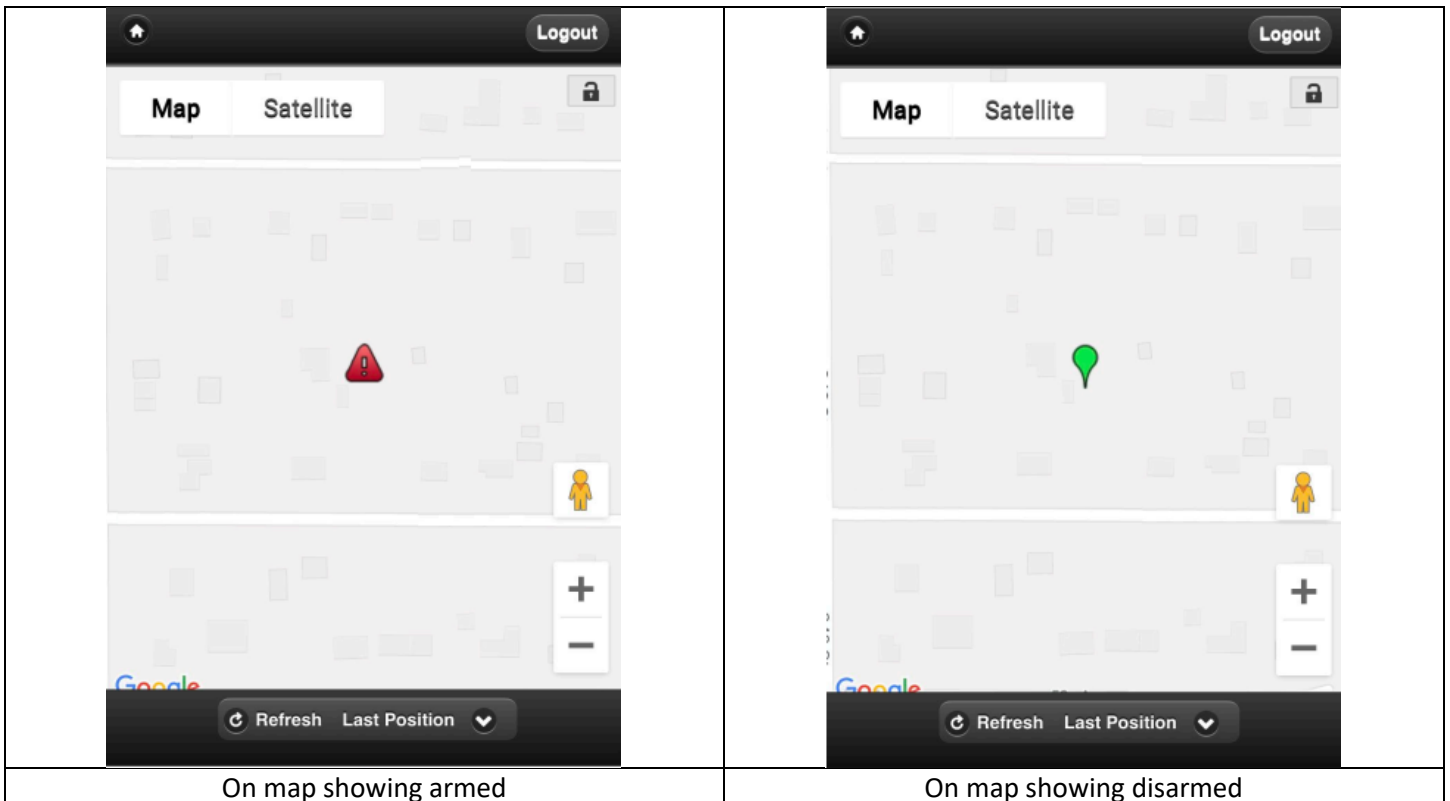

System is not armed

System is armed

Clicking on the address area above the "N – Trailer Alarms" is actually a button. It can be finicky depending on your connection and phone's sensitivity. This will take you to a summary screen like below:

If you tap the last location address (BLUE) area, it will take you to a mapped location of the unit.
Please note, the location may be approximate depending on satellite fix and/or other potential interference.

The Alerts tab shows you basically that the system has been pinged regularly:

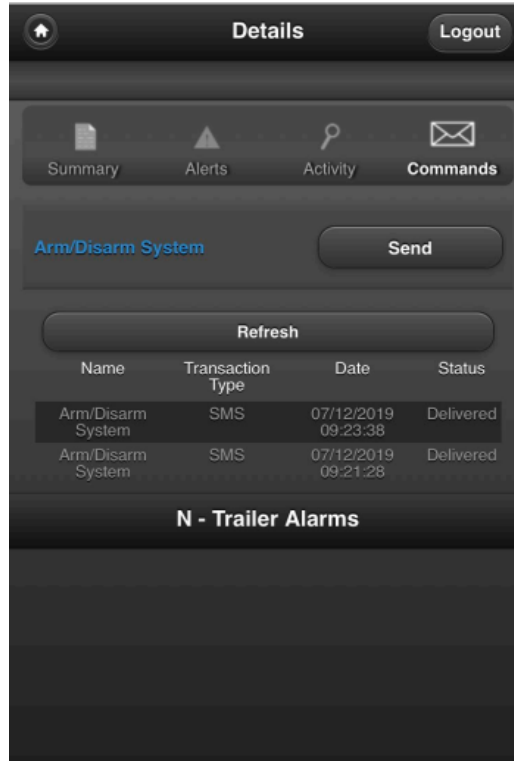

Date	Trigger	Cleared By: Duplicate:
07/29/2019 12:16:03	Armed - Interval Report	False
07/29/2019 11:16:03	Armed - Interval Report	False

N - Trailer Alarms

The last tab is the Command screen. Here you can remotely arm/disarm the system.
The Command may take several moments to send. Please do not press this button repeatedly in rapid fashion.

We want to make sure the system is working properly for you so please work with it and test all the features.

Any questions, please reach out to us.
